The Philippine Journal of Science is now accepting submissions for a special issue on Genomics, dedicated to exploring the application of ‘omics technology and bioinformatics in the country, covering all areas of biological investigation, including but not limited to health, agriculture, biodiversity, ethnicity, and forensics.

We will accept submission of primary research offering novel insights into:

- genomics (whole genome sequencing, targeted resequencing studies)
- functional genomics (transcriptional profiling, analysis of mRNA, microRNA, noncoding and other RNAs)
- evolutionary and comparative genomics
- genomic technology and methodology development
- computational biology, bioinformatics and biostatistics
- population genomics, association studies
- other ‘omics fields: transcriptomics, proteomics, metagenomics, metabolomics, epigenomics

The deadline for submissions is March 15, 2019. Authors are advised to consult the most recent issue of the Philippine Journal of Science for the current format and style. Submissions are sent via email to:

The Editor-in-Chief
Philippine Journal of Science
