# CALL FOR PAPERS

## PHILIPPINE JOURNAL OF SCIENCE

SPECIAL ISSUE ON THE PHILIPPINE MARINE BOTANICAL RESEARCH

*Chamaebotrys proliferus*, from Richard V. Dumilag

The Philippine Journal of Science is now accepting submissions for the special issue on Philippine Marine Botanical Research, dedicated to the latest studies on different aspects of marine microalgae, macroalgae, and seagrasses found in the Philippines.

Submission of results of primary research offering novel insights into marine plants within but not limited to the following areas is welcomed:

- Basic biology, physiology, and ecology
- Taxonomy, systematics, phylogenetics, evolution, and distribution
- Genetics, reproductive biology, breeding and strain selection
- Biochemistry, utilization, applications, and processing
- Farming and culture
- Conservation and environment

Other manuscripts relevant to this focused issue are also welcomed.

The deadline for submission is **July 31, 2021**.

Authors are advised to consult the PJS Author's Guide ([www.philjournalsci.dost.gov.ph](http://www.philjournalsci.dost.gov.ph)) for the submission requirements, and manuscript format and style. Submissions are sent via email to:
